

Project Highlights

- V-ROD® GFRP was used in new deck overlay, approach slabs, sidewalks and parapet walls
- Bottom layer of deck used some #6 (19m) bar spaced at 150mm while main reinforcing was #5 (16m) spaced at 300mm
- Lightpole base also had some #5 and #6 bar with custom bends and ties
- V-rod® used mainly for non-corrosive properties

Addington Ave rehab - summer 2010

- V-ROD Canada supplied V-ROD® on rehabilitation of Addington Ave in the City of Toronto due to corrosion of existing structure
- Owner: City of Toronto
- Contractor: Anskon Contracting/Rebar Enterprises
- Engineer: AECOM
