

Project Highlights

- V-ROD® GFRP rebar cast in pre-cast deck slabs in bridge rehabilitation
- Pre-cast deck panels mainly used #5 (16m) and some #3 (10m) bar
- V-ROD® GFRP reinforcing selected due to non-corrosive properties, lightweight, and durability. Utilizing GFRP composite bar in pre-cast applications provide greater quality control, simpler and quicker installation on site.

Sunshine Creek, ON summer 2007

- V-ROD Canada supplied V-ROD® GFRP reinforcement for the Sunshine Creek project in the Thunder Bay region
- Owner: Ministry of Transportation - NW Region
- Contractor: LH North/Lafarge pre-cast/Harris Rebar
- Engineer: Hatch Mott McDonald/MTO
